

As you know, Chiron's license for Fluvirin vaccine was reinstated by the MHRA, UK's regulatory agency. As such, Chiron now has clearance to initiate full production of Fluvirin vaccine. The decision is conditioned on the understanding that Chiron's high level of commitment to the completion of its remediation plan and ongoing improvements will continue. I copied and pasted an article that appeared yesterday. It is public information. It can be found at www.chiron.com under "Important Information to the Public and Chiron Customers." Please note that for the next couple of days, there will be more updated press releases.
